Subject Index of Volume 139

Acetylacetonates
  crystal structure of adduct of Th(IV) tetrakis-acetylacetonate with aniline, $[Th(C_5H_7O_2)_4]_2 \cdot C_6H_5NH_2$, 51
Actinide ions
  spectroscopic properties of tetravalent actinide ions in solids, 223
Actinide molecules
  recent developments in theory of f-element molecules, 243
Adenosine phosphates
  NMR study of Ln-NOTA chelates as aqueous paramagnetic shift and relaxation probes, 311
  thermodynamics of Ln(III) complexation with AMP and ATP, 119
Alkaline earth sulfides
  photoluminescence study of Tb^{3+} doped alkaline earth sulfide thin films, 261
Alkoxides
  synthesis and structure of tris(cyclopentadienyl)U fluoroalkoxides, 187
  U(IV) and Th(IV) hydrotris(3,5-dimethylpyrazolyl)borate complexes with asymmetric metal centres, 83
Allyls
  crystal structure of $[Li_2(\mu\text{-}C_3H_5)(C_4H_8O_2)_3]\text{-}[Ce(\eta^3\text{-}C_3H_5)_4]$, 203
Aminopolyacetic acids
  importance of ligand excess in investigations of fluoroscence intensity of Ln(III) complexes of aminopolyacetic acids in aqueous solutions, 299
  spectroscopic investigation of Eu–EDTA complexes, 303
Aryloxides
  some aspects of coordination and organometallic chemistry of Th and U (M^{III}, M^{IV}, U^{V}) in +3 and +4 oxidation states, 13
  tris(2,6-di-t-butylphenoxo)Y; three-coordinate hydrocarbon-soluble aryloxide of Y, 183
  U(IV) and Th(IV) hydrotris(3,5-dimethylpyrazolyl)borate complexes with asymmetric metal centres, 83

Benzylidenepyruvates
  complexation of trivalent lanthanides and yttrium by benzylidenepyruvates in aqueous solution, 163
Berkelium
  laser induced fluorescence of $^{249}Bk^{4+}$ in CeF_4, 273
  possible stabilization of tetravalent oxidation state of Bk and Cf in acetonitrile with triphenylarsine oxide, 111
Binuclear complexes
  actinide complexes with Schiff bases; first crystal structure of binuclear Th(IV) complex with pentadentate compartmental ligand, 61
  crystal and molecular structure of novel organoactinide complex, $[U(C_5H_5)_3(NCCH_3)_2]^+\text{-}[Th(C_5H_5)Cl_4(NCCH_3)]^-$, 209
  reduced biuranocenylene – mixed valence organouranium compound?, 193
Borohydrides
  preparation and crystal structures of tetrakis-(methyltrihydroborato)U(IV)bis(tetrahydrofuranate) and tetrakis(methyltrihydroborato)-U(IV)tetrahydrothiophenate, 91
  preparation of some Lewis base adducts of tris-(methyltrihydroborato)Ho and Yb and crystal structures of tris(methyltrihydroborato)Y(III)-etherate and tris(methyltrihydroborato)Ho(III)-bis(pyridine), 97

Californium
  possible stabilization of tetravalent oxidation state of Bk and Cf in acetonitrile with triphenylarsine oxide, 111
Carboxylic acids
  complexation of uranyl ion with carboxylic acids studied by ^1H and ^{13}C NMR, 309
Cerium
  coordination chemistry of trivalent U and Ce, 201
  crystal structure of $[Li_2(\mu\text{-}C_3H_5)(C_4H_8O_2)_3]\text{-}[Ce(\eta^3\text{-}C_3H_5)_4]$, 203
  studies on kinetics of formation and dissociation of Ce(III)–DOTA complex, 141
Coordination compounds
  new trends in structural chemistry of actinide and lanthanide coordination compounds, 21
Crown ethers
  Eu(III) as sensitive probe of ligand conformation in dicyclohexyl-18-crown-6-complexes, 297
Crystal field analysis
  crystal field effects in Lu disilicates doped with Eu^{3+}, 253
  crystal field splitting pattern of perdeuterated tris(η^5-cyclopentadienyl)U(IV)chloride in low energy range, 339
  optical properties of U^{4+} in α-$ThBr_4$, 269
  parametrization of crystal field splitting patterns of quasi trigonal bi-pyramidal anionic complexes involving tris(η^5-cyclopentadienyl)-U(IV) moiety, 335

© Elsevier Sequoia/Printed in Switzerland

re-examination of $4f^3$ energy parameters for several systems with Nd–O atom coordination, 291
spectroscopic study of $TbAl_3(BO_3)_4$ crystal, 277
spin-correlated crystal-field interactions in NdF_3, Nd^{3+}:LaF_3 and Nd^{3+}:$LiYF_4$, 287
of Tb^{3+}:LaF_3 and Gd^{3+}:LaF_3 in C_{2v} site symmetry, 275
Cyclooctatetraenyl ligands
anisotropy in proton NMR paramagnetic shift of cyclooctatetraene and cyclopentadiene anions coordinated to U(IV), 319
reduced biuranocenylene – mixed valence organouranium compound?, 193
Cyclopentadienyl ligands
anisotropy in proton NMR paramagnetic shift of cyclooctatetraene and cyclopentadiene anions coordinated to U(IV), 319
some aspects of coordination and organometallic chemistry of Th and U (M^{III}, M^{IV}, U^{V}) in +3 and +4 oxidation states, 13
coordination chemistry of trivalent U and Ce, 201
crystal field splitting pattern of perdeuterated tris(η^5-cyclopentadienyl)U(IV)chloride in low energy range, 339
crystal and molecular structure of novel organoactinide complex, $[U(C_5H_5)_3(NCCH_3)_2]^+$-$[Th(C_5H_5)Cl_4(NCCH_3)]^-$, 209
gadoliniumdicyclopentadienidechloride $[Gd(C_5H_5)_2Cl]_4$, 215
^{139}La NMR spectroscopy of triscyclopentadienyllanthanum(III) derivatives; promising new tool for solution studies, 315
model for describing paramagnetic Mössbauer relaxation spectra of organometallic ^{237}Np compounds, 323
parametrization of crystal field splitting patterns of quasi trigonal bi-pyramidal anionic complexes involving tris(η^5-cyclopentadienyl)U(IV) moiety, 335
photoelectron study of pentavalent U imido complexes, 331
reaction of diiodoethane with Np and Pu metals, 189
small molecule activation at U C multiple bond, 177
syntheses and identification of 1,1′-pentamethylenedicyclopentadienyl lanthanide chlorides, Y chloride and Y cyclopentadienyl derivative, 195
synthesis, structure and reactivity of organometallic complexes of Sm(II), 169
synthesis and structure of tris(cyclopentadienyl)U fluoroalkoxides, 187
synthesis and X-ray structure of novel monocyclopentadienyluranium(IV) chloride $[UCp'''Cl_2(THF)(\mu\text{-}Cl)_2Li(THF)_2]$ [$Cp''' = \eta\text{-}C_5H_2(SiMe_3)_3$-1,2,4], 185
U(IV) and Th(IV) hydrotris(3,5-dimethylpyrazolyl)borate complexes with asymmetric metal centres, 83
Dicarboxylic acids
lanthanide complexes with pyridine-2,6-dicarboxylic and thiophene-2,5-dicarboxylic acids, 67
NMR study of Ln-NOTA chelates as aqueous paramagnetic shift and relaxation probes, 311
β-Diketonates
mixed pyrazolylborate–β-diketonate–Ln(III) complexes, 75
Dithiocarbamates
crystal structures of three UO_2^{2+} complexes with S-donors, 49
Dysprosium
lanthanide complexes with pyridine-2,6-dicarboxylic and thiophene-2,5-dicarboxylic acids, 67

Electronic Raman effect
in lanthanide(III) complexes; ligand polarization contribution, 343
Energy level structure
laser induced fluorescence of $^{249}Bk^{4+}$ in CeF_4, 273
Erbium
new ^{166}Er nuclear states populated in ^{166m}Ho decay, 353
ultrasonic relaxation measurements on Er chloride in water and methanol, 107
Europium
crystal field effects in Lu disilicates doped with Eu^{3+}, 253
Eu(III) complexation reactions in water, 33
Eu(III) as sensitive probe of ligand conformation in dicyclohexyl-18-crown-6-complexes, 297
Eu(III) ion as spectroscopic probe in bioinorganic chemistry, 219
importance of ligand excess in investigations of fluorescence intensity of Ln(III) complexes of aminopolyacetic acids in aqueous solutions, 299
luminescence of Eu^{3+} ion as structural probe in high temperature phase transformations in Lu orthoborates, 257
Mössbauer effect study of some Eu(III) nitrate complexes with unidentate oxygen-donor ligands, 113
peculiar fluorescence of Eu^{3+} in oxyapatites, 307
spectroscopic investigation of Eu–EDTA complexes, 303

FT-IR studies
^{139}La NMR and quantitative FT-IR investigation of interaction between Ln(III) ions and various anions in organic solvents, 151
Fluoroalkoxides
synthesis and structure of tris(cyclopentadienyl)U fluoroalkoxides, 187

Gadolinium
crystal-field analysis of Tb^{3+}:LaF_3 and Gd^{3+}:LaF_3 in C_{2v} site symmetry, 275
gadoliniumdicyclopentadienidechloride $[Gd(C_5H_5)_2Cl]_4$, 215
lanthanide complexes with pyridine-2,6-dicarboxylic and thiophene-2,5-dicarboxylic acids, 67
Gadolinium fluorides
energy transfer in some luminescent gadolinium fluorides, 265

History
concepts and techniques in discovery of actinide elements, 7
lanthanides since 1839; from crowded elements to quantum-chemical Rosetta Stone, 1
Holmium
preparation of some Lewis base adducts of tris(methyltrihydroborato)Ho and Yb and crystal structures of tris(methyltrihydroborato)Y(III)-etherate and tris(methyltrihydroborato)Ho(III)-bis(pyridine), 97
synthesis and crystal structure of complex [perrhenate-bis(1,4-dithiane 1,4-dioxide)mono(μ-1,4-dithiane 1,4-dioxide)triaquaholmium(III) polymer]perrhenate-1,4-dithiane 1,4-dioxide, 131

Imido complexes
photoelectron study of pentavalent U imido complexes, 331

Kinetic studies
competitive equilibria in lanthanide trifluoromethanesulfonate solutions in propylene carbonate containing 15-crown-5 ether, 153
of formation and dissociation of Ce(III)–DOTA complex, 141
formation of mixed complexes of NdMEDTA and NdHyEDTA with acetate, 143
photostimulated oxygen exchange and photochemical properties of uranyl ions, 345
water exchange kinetics on lanthanide(III) ions; variable temperature and pressure ^{17}O NMR study, 147

Lanthanide aquacomplexes
water exchange kinetics on lanthanide(III) ions; variable temperature and pressure ^{17}O NMR, 147
Lanthanide carboxylates
synthesis and characterization of several lanthanide complexes with ethyl α-ketocyclopentyl carboxylate, 135
Lanthanide chlorides
crystal structure of Dy trichloride complex with oxygen donor ligands, 103
syntheses and identification of 1,1′-pentamethylenedicyclopentadienyl lanthanide chlorides, Y chloride and Y cyclopentadienyl derivative, 195
Lanthanide perchlorates
^{139}La NMR and quantitative FT-IR investigation of interaction between Ln(III) ions and various anions in organic solvents, 151
Lanthanide phosphinoacetates
synthesis and infrared studies of dichlorolanthanide complexes of ethyl 2-(diphenyloxophosphino)acetates, 161
Lanthanide phthalocyanines
synthesis and characterization of rare earth monophthalocyanine complexes, 165
Lanthanide polyazamethylenephosphonates
^{31}P and ^{23}Na NMR lanthanide induced shifts in axially symmetric macrocyclic phosphonate complexes, 137
Lanthanide polyazapolycarboxylates
NMR study of Ln-NOTA chelates as aqueous paramagnetic shift and relaxation probes, 311
Lanthanide sulfites
preparative and thermal study on rare earth sulfite sulfate hydrates, 121
Lanthanide sulfonates
competitive equilibria in lanthanide trifluoromethanesulfonate solutions in propylene carbonate containing 15-crown-5 ether, 153
Lanthanide sulfoxides
thermal decomposition of octakis(*p*-dimethylphenylsulfoxide)lanthanide(III) perchlorates in helium atmosphere, 125
Lanthanum
^{139}La NMR and quantitative FT-IR investigation of interaction between Ln(III) ions and various anions in organic solvents, 151
^{139}La NMR spectroscopy of triscyclopentadienyllanthanum(III) derivatives; promising new tool for solution studies, 315
lanthanide complexes with pyridine-2,6-dicarboxylic and thiophene-2,5-dicarboxylic acids, 67
novel (3 + 3) hexaimine Schiff base macrocyclic complex of La, 55
polypyrazolylborate complexes of Y and La, 71
structural investigations of isomorphous propionitrile-tris(η^5-cyclopentadienyl)lanthanoid(III) (Ln = La, Pr, Yb) complexes and of corresponding 1:2 adducts, 211
Lewis base adducts
coordination chemistry of trivalent U and Ce, 201
preparation and crystal structures of tetrakis(methyltrihydroborato)U(IV)bis(tetrahydrofuranate) and tetrakis(methyltrihydroborato)-U(IV)tetrahydrothiophenate, 91
preparation of some Lewis base adducts of tris(methyltrihydroborato)Ho and Yb and crystal structures of tris(methyltrihydroborato)Y(III)-etherate and tris(methyltrihydroborato)Ho(III)-bis(pyridine), 97

structural investigations of isomorphous propionitrile-tris(η^5-cyclopentadienyl) lanthanoid(III) (Ln = La, Pr, Yb) complexes and of corresponding 1:2 adducts, 211

Luminescence studies
absorption and emission analysis of Pr^{3+} in Y Al garnet, 281
crystal field effects in Lu disilicates doped with Eu^{3+}, 253
energy transfer in some luminescent gadolinium fluorides, 265
Eu(III) as sensitive probe of ligand conformation in dicyclohexyl-18-crown-6-complexes, 297
Eu(III) ion as spectroscopic probe in bioinorganic chemistry, 219
importance of ligand excess in investigations of fluorescence intensity of Ln(III) complexes of aminopolyacetic acids in aqueous solutions, 299
laser induced fluorescence of $^{249}Bk^{4+}$ in CeF_4, 273
luminescence behaviour of uranyl nitrate hydrates, 301
luminescence of Eu^{3+} ion as structural probe in high temperature phase transformations in Lu orthoborates, 257
peculiar fluorescence of Eu^{3+} in oxyapatites, 307
photoluminescence study of Tb^{3+} doped alkaline earth sulfide thin films, 261
spectroscopic investigation of Eu–EDTA complexes, 303
two-photon excitation of Sm^{2+} ion in BaClF, 295

Lutetium
mixed pyrazolylborate–β-diketonate–Ln(III) complexes, 75

Lutetium disilicates
crystal field effects in Lu disilicates doped with Eu^{3+}, 253

Lutetium orthoborates
luminescence of Eu^{3+} ion as structural probe in high temperature phase transformations in Lu orthoborates, 257

Macrocyclic chelates
formation of mixed complexes of NdMEDTA and NdHgEDTA with acetate, 143
NMR study of Ln-NOTA chelates as aqueous paramagnetic shift and relaxation probes, 311
^{31}P and ^{23}Na NMR lanthanide induced shifts in axially symmetric macrocyclic phosphonate complexes, 137
studies on kinetics of formation and dissociation of Ce(III)–DOTA complex, 141

Magnetic circular dichroism
parametrization of crystal field splitting patterns of quasi trigonal bi-pyramidal anionic complexes involving tris(η^5-cyclopentadienyl)U(IV) moiety, 335
spectroscopic study of $TbAl_3(BO_3)_4$ crystal, 277

Mössbauer studies
model for describing paramagnetic Mössbauer relaxation spectra of organometallic ^{237}Np compounds, 323
Mössbauer effect study of some Eu(III) nitrate complexes with unidentate oxygen-donor ligands, 113

Neodymium
formation of mixed complexes of NdMEDTA and NdHgEDTA with acetate, 143
re-examination of $4f^3$ energy parameters for several systems with Nd–O atom coordination, 291
spin-correlated crystal-field interactions in NdF_3, Nd^{3+}:LaF_3 and Nd^{3+}:$LiYF_4$, 287
synthesis and characterization of complexes of Nd(III) with piperazines, 155

Neptunium
model for describing paramagnetic Mössbauer relaxation spectra of organometallic ^{237}Np compounds, 323
photoelectron spectroscopy study of Np_2O_3 formation on surface of Np metal, 327
reaction of diiodoethane with Np and Pu metals, 189

NMR studies
anisotropy in proton NMR paramagnetic shift of cyclooctatetraene and cyclopentadiene anions coordinated to U(IV), 319
complexation of uranyl ion with carboxylic acids studied by ^1H and ^{13}C NMR, 309
^{139}La NMR
and quantitative FT-IR investigation of interaction between Ln(III) ions and various anions in organic solvents, 151
spectroscopy of triscyclopentadienyllanthanum-(III) derivatives; promising new tool for solution studies, 315
of Ln-NOTA chelates as aqueous paramagnetic shift and relaxation probes, 311
mixed pyrazolylborate–β-diketonate–Ln(III) complexes, 75
^{31}P and ^{23}Na NMR lanthanide induced shifts in axially symmetric macrocyclic phosphate complexes, 137
polypyrazolylborate complexes of Y and La, 71
reduced biuranocenylene – mixed valence organouranium compound?, 193
reduction of U(IV) complexes containing hydrotris(3,5-dimethylpyrazolyl)borate ligand, 87
synthesis and characterization
of rare earth monophthalocyanine complexes, 165
of $UCl_2[HB(3,5\text{-}Me_2pz)_3](3,5\text{-}Me_2pz)$ and $MCl_3[HB(3,5\text{-}Me_2pz)_3](3,5\text{-}Me_2pzH)$

(M = U(IV) and Th(IV); pz = pyrazolyl), 79
U(IV) bishydrotris(pyrazol-1-yl)boratothiolato derivatives, 89
U(IV) and Th(IV) hydrotris(3,5-dimethylpyrazolyl(borate complexes with asymmetric metal centres, 83
water exchange kinetics on lanthanide(III) ions; variable temperature and pressure ^{17}O NMR study, 147
Nuclear energy levels
new ^{166}Er nuclear states populated in ^{166m}Ho decay, 353
Nuclear spectroscopy
new ^{166}Er nuclear states populated in ^{166m}Ho decay, 353

Organometallics
some aspects of coordination and organometallic chemistry of Th and U (M^{III}, M^{IV}, U^{V}) in +3 and +4 oxidation states, 13
MO study on structures and reactivity of organoactinides based on extended Hückel method; actinide bis(cyclopentadienyl) complexes, 247
reactivity of U—C σ-bond in 'silylamido' compounds, 169
small molecule activation at U C multiple bond, 177
synthesis, structure and reactivity of organometallic complexes of Sm(II), 169
Oscillator strengths
for f → d transitions in lanthanide and actinide aqua ions, 341
Oxyapatites
peculiar fluorescence of Eu^{3+} in oxyapatites, 307
Oxygen donor ligands
crystal structure of Dy trichloride complex with oxygen donor ligands, 103
Mössbauer effect study of some Eu(III) nitrate complexes with unidentate oxygen-donor ligands, 113
possible stabilization of tetravalent oxidation state of Bk and Cf in acetonitrile with triphenylarsine oxide, 111
recent advances in chemistry of UX_4 complexes (X = Cl, Br and I), 105
Oxygen exchange
photostimulated oxygen exchange and photochemical properties of uranyl ions, 345

Photochemical properties
photostimulated oxygen exchange and photochemical properties of uranyl ions, 345
Photoelectron spectroscopic studies
photoelectron study of pentavalent U imido complexes, 331
UPS/XPS study of Np_2O_3 formation on surface of Np metal, 327
Piperazines
synthesis and characterization of complexes of Nd(III) with piperazines, 155
Plutonium
reaction of diiodoethane with Np and Pu metals, 189
Polypyrazolylborates
mixed pyrazolylborate–β-diketonate–Ln(III) complexes, 75
polypyrazolylborate complexes of Y and La, 71
reduction of U(IV) complexes containing hydrotris(3,5-dimethylpyrazolyl)borate ligand, 87
synthesis and characterization of UCl_2[HB(3,5-Me_2pz)$_3$](3,5-Me_2pz) and MCl_3[HB(3,5-Me_2-pz)$_3$](3,5-Me_2pzH) (M = U(IV) and Th(IV); pz = pyrazolyl), 79
U(IV) bishydrotris(pyrazol-1-yl)boratothiolato derivatives, 89
U(IV) and Th(IV) hydrotris(3,5-dimethylpyrazolyl)borate complexes with asymmetric metal centres, 83
Praseodymium
absorption and emission analysis of Pr^{3+} in Y Al garnet, 281
structural investigations of isomorphous propionitrile-tris(η^5-cyclopentadienyl) lanthanoid(III) (Ln = La, Pr, Yb) complexes and of corresponding 1:2 adducts, 211

Samarium
synthesis, structure and reactivity of organometallic complexes of Sm(II), 169
two-photon excitation of Sm^{2+} ion in BaClF, 295
Scandium
complexation of trivalent lanthanides and yttrium by benzylidenepyruvates in aqueous solution, 163
novel Schiff base complexes of some f-transition and related elements, 69
Schiff bases
actinide complexes with Schiff bases; first crystal structure of binuclear Th(IV) complex with pentadentate compartmental ligand, 61
dioxouranium(VI) complexes with polydentate Schiff bases containing acetal groups, 65
lanthanide complexes with macrocyclic and macroacyclic Schiff bases, 59
of lanthanides and actinides, 39
novel (3 + 3) hexaimine Schiff base macrocyclic complex of La, 55
novel Schiff base complexes of some f-transition and related elements, 69
Spectroscopic properties
crystal-field analysis of Tb^{3+}:LaF_3 and Gd^{3+}:LaF_3 in C_{2v} site symmetry, 275
Eu(III) ion as spectroscopic probe in bioinorganic chemistry, 219

optical properties of U^{4+} in α-$ThBr_4$, 269
spectroscopic study of $TbAl_3(BO_3)_4$ crystal, 277
of tetravalent actinide ions in solids, 223
Structural chemistry
new trends in structural chemistry of actinide and lanthanide coordination compounds, 21
Sulfoxides
dioxouranium(VI) complexes with γ-disulfoxides, 159

Terbium
crystal-field analysis of Tb^{3+}:LaF_3 and Gd^{3+}:LaF_3 in C_{2v} site symmetry, 275
photoluminescence study of Tb^{3+} doped alkaline earth sulfide thin films, 261
spectroscopic study of $TbAl_3(BO_3)_4$ crystal, 277
Theoretical studies
MO study on structures and reactivity of organo-actinides based on extended Hückel method; actinide bis(cyclopentadienyl) complexes, 247
recent developments in theory of f-element molecules, 243
Thermal studies
preparative and thermal study on rare earth sulfite sulfate hydrates, 121
thermal decomposition of octakis(*p*-dimethyl-phenylsulfoxide)lanthanide(III) perchlorates in helium atmosphere, 125
Thermodynamic studies
thermodynamics of Ln(III) complexation with AMP and ATP, 119
Thiolates
some aspects of coordination and organometallic chemistry of Th and U (M^{III}, M^{IV}, U^{V}) in +3 and +4 oxidation states, 13
U(IV) bishydrotris(pyrazol-1-yl)boratothiolato derivatives, 89
Thorium
actinide complexes with Schiff bases; first crystal structure of binuclear Th(IV) complex with pentadentate compartmental ligand, 61
some aspects of coordination and organometallic chemistry of Th and U (M^{III}, M^{IV}, U^{V}) in +3 and +4 oxidation states, 13
complexation of trivalent lanthanides and yttrium by benzylidenepyruvates in aqueous solution, 163
crystal and molecular structure of novel organo-actinide complex, $[U(C_5H_5)_3(NCCH_3)_2]^+$-$[Th(C_5H_5)Cl_4(NCCH_3)]^-$, 209
crystal structure of adduct of Th(IV) tetrakis-acetylacetonate with aniline, $[Th(C_5H_7O_2)_4]_2 \cdot C_6H_5NH_2$, 51
MO study on structures and reactivity of organo-actinides based on extended Hückel method; actinide bis(cyclopentadienyl) complexes, 247
novel Schiff base complexes of some f-transition and related elements, 69
synthesis and characterization of UCl_2[HB(3,5-$Me_2pz)_3$](3,5-Me_2pz) and MCl_3[HB(3,5-$Me_2pz)_3$](3,5-Me_2pzH) (M = U(IV) and Th(IV); pz = pyrazolyl), 79
U(IV) and Th(IV) hydrotris(3,5-dimethylpyra-zolyl)borate complexes with asymmetric metal centres, 83
Trimethylsilylamides
some aspects of coordination and organometallic chemistry of Th and U (M^{III}, M^{IV}, U^{V}) in +3 and +4 oxidation states, 13
photoelectron study of pentavalent U imido complexes, 331
reactivity of U–C σ-bond in 'silylamido' com-pounds, 171
reduction of U(IV) complexes containing hydro-tris(3,5-dimethlpyrazolyl)borate ligand, 87

Ultrasonic relaxation
Eu(III) complexation reactions in water, 33
ultrasonic relaxation measurements on Er chloride in water and aqueous methanol, 107
Uranium
anisotropy in proton NMR paramagnetic shift of cyclooctatetraene and cyclopentadiene anions coordinated to U(IV), 319
some aspects of coordination and organometallic chemistry of Th and U (M^{III}, M^{IV}, U^{V}) in +3 and +4 oxidation states, 13
complexation of trivalent lanthanides and yttrium by benzylidenepyruvates in aqueous solution, 163
coordination chemistry of trivalent U and Ce, 201
crystal field splitting pattern of perdeuterated tris(η^5-cyclopentadienyl)U(IV)chloride in low energy range, 339
crystal and molecular structure of novel organo-actinide complex, $[U(C_5H_5)_3(NCCH_3)_2]^+$-$[Th(C_5H_5)Cl_4(NCCH_3)]^-$, 209
crystal structures of three UO_2^{2+} complexes with S-donors, 49
dioxouranium(VI) complexes
with γ-disulfoxides, 159
with polydentate Schiff bases containing acetal groups, 65
MO study on structures and reactivity of organo-actinides based on extended Hückel method; actinide bis(cyclopentadienyl) complexes, 247
novel Schiff base complexes of some f-transition and related elements, 69
optical properties of U^{4+} in α-$ThBr_4$, 269
parametrization of crystal field splitting patterns of quasi trigonal bi-pyramidal anionic com-plexes involving tris(η^5-cyclopentadienyl)U(IV) moiety, 335

Uranium
photoelectron study of pentavalent U imido complexes, 331
preparation and crystal structure of tetrakis-(methyltrihydroborato)U(IV)bis(tetrahydrofuranate) and tetrakis(methyltrihydroborato)-U(IV)tetrahydrothiophenate, 91
reactivity of U–C σ-bond in 'silylamido' compounds, 171
recent advances in chemistry of UX_4 complexes (X = Cl, Br and I), 105
reduced biuranocenylene – mixed valence organouranium compound?, 193
reduction of U(IV) complexes containing hydrotris(3,5-dimethylpyrazolyl)borate ligand, 87
small molecule activation at U C multiple bond, 177
synthesis and characterization
of Na di-μ-hydroxo-bis[3,6-disulpho-1,2-naphthoquinone-1-oximato-*O*,*N*-dioxouranate-(VI)], 129
of $UCl_2[HB(3,5\text{-}Me_2pz)_3](3,5\text{-}Me_2pz)$ and $MCl_3[HB(3,5\text{-}Me_2pz)_3](3,5\text{-}Me_2pzH)$ (M = U(IV) and Th(IV); pz = pyrazolyl), 79
synthesis and structure of tris(cyclopentadienyl)U fluoroalkoxides, 187
synthesis and X-ray structure of novel monocyclopentadienyluranium(IV) chloride $[UCp'''Cl_2(THF)(\mu\text{-}Cl)_2Li(THF)_2]$ [$Cp''' = \eta\text{-}C_5H_2(SiMe_3)_3$-1,2,4], 185
U(IV) bishydrotris(pyrazol-1-yl)boratothiolato derivatives, 89
U(IV) and Th(IV) hydrotris(3,5-dimethylpyrazolyl)borate complexes with asymmetric metal centres, 83
Uranyl hydrates
luminescence behaviour of uranyl nitrate hydrates, 301
Uranyl ions
complexation of uranyl ion with carboxylic acids studied by ^1H and ^{13}C NMR, 309
photostimulated oxygen exchange and photochemical properties of uranyl ions, 345
Water exchange kinetics
on lanthanide(III) ions; variable temperature and pressure ^{17}O NMR study, 147
Ytterbium
mixed pyrazolylborate–β-diketonate–Ln(III) complexes, 75
preparation of some Lewis base adducts of tris-(methyltrihydroborato)Ho and Yb and crystal structures of tris(methyltrihydroborato)Y(III)-etherate and tris(methyltrihydroborato)Ho(III)-bis(pyridine), 97
structural investigations of isomorphous propionitrile-tris(η^5-cyclopentadienyl) lanthanoid(III) (Ln = La, Pr Yb) complexes and of corresponding 1:2 adducts, 211
Yttrium
complexation of trivalent lanthanides and yttrium by benzylidenepyruvates in aqueous solution, 163
novel Schiff base complexes of some f-transition and related elements, 69
polypyrazolylborate complexes of Y and La, 71
syntheses and identification of 1,1′-pentamethylenedicyclopentadienyl lanthanide chlorides, Y chloride and Y cyclopentadienyl derivative, 195
tris(2,6-di-t-butylphenoxo)Y; three-coordinate hydrocarbon-soluble aryloxide of Y, 183
Yttrium aluminium garnet
absorption and emission analysis of Pr^{3+} in YAG, 281
